PRODUCT OVERVIEW

Polish-manufactured stored-pressure ABC powder extinguisher from OGNIOCHRON S.A., model GP-1x ABC/M, sized for passenger cars, camper vans, and motorboats where buyers want full ABC cover in the smallest cylinder that fits a footwell or boot locker. The 1 kg charge is rated 8A 34B C under EN 3-7 with CNBOP-PIB approval, covers solids, flammable liquids, gases, and energised electrical equipment up to 1000 V, and weighs 1.7 kg with the cylinder standing 288 mm high. Each unit ships with a moulded plastic vehicle hanger sized to this cylinder so it can be mounted in a visible position rather than left loose under a seat. A pressure gauge is fitted so charge status can be read without weighing the cylinder.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
