PRODUCT OVERVIEW

European-manufactured a stored-pressure ABC powder extinguisher sized for vehicles, unheated rooms, and outdoor points where a larger unit will not be carried. It is rated 8A 34B C under EN 3-7, runs six seconds on a continuous discharge, and is approved for live electrical equipment up to 1000 V when used from at least one metre away. Each unit we ship includes a pressure gauge and wall holder so it can be hung at the point of use rather than left loose in a footwell or cupboard, manufactured in Europe.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
