PRODUCT OVERVIEW

Polish-manufactured stored-pressure ABC powder extinguisher from OGNIOPHON S.A., model GP-2x ABC/M, sized for passenger cars, camper vans, and motorboats where buyers want more fire-fighting capacity than a 1 kg car unit without moving to a workplace-sized cylinder. The 2 kg charge is rated 13A 89B C under EN 3-7 with CNBOP-PIB approval, covers solids, flammable liquids, gases, and energised electrical equipment up to 1000 V, and weighs 3.7 kg with the cylinder standing 366 mm high. Each unit ships with a metal basket hanger sized to this cylinder so it can be mounted in a visible position rather than left loose under a seat. The ABC medium gives broader cover than BC-only car lines, including upholstery and luggage, which matches mixed-risk vehicle interiors.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
