PRODUCT OVERVIEW

Polish-manufactured stored-pressure BC powder extinguisher from OGNIOPHON S.A., model GP-1z BC/M, sized for passenger cars, camper vans, and motorboats where space in the boot or cabin is tight. The 1 kg BC charge is rated 21B C under EN 3-7 with CNBOP-PIB approval, covers flammable liquids, gases, and energised electrical equipment up to 1000 V, and weighs 1.6 kg with the cylinder standing 265 mm high. Each unit ships with a moulded plastic vehicle hanger so it can be mounted in a visible position rather than left loose under a seat. The BC medium is specified for fuel, LPG, and electrical fires rather than solid combustibles, which matches the realistic first-fire risks in a vehicle.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
