PRODUCT OVERVIEW

Polish-manufactured CO2 fire extinguisher from OGNIOTRON S.A., model GS-5x B/MP, sized for offices, computer rooms, electronics workshops, garages, and plant areas where buyers need residue-free suppression on flammable liquids and energised equipment without powder contamination. The 5 kg liquefied CO2 charge is rated 89B under EN 3-7 with CNBOP-PIB approval and ships with a UDT operating permit required for registration in Poland. It is approved for live electrical equipment to 1000 V and 245 000 V per the manufacturer parameter sheet, operates from -30 °C to +60 °C, and leaves no dry powder or foam residue after discharge. Each unit ships with a red disc wall hanger and black securing strap. At 14 kg gross weight and 685 mm high it is the standard workplace CO2 portable for paint shops, server rooms, and electrical plant where a smaller 2 kg unit would not meet the calculated B rating.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
