

PORTABLE FIRE EXTINGUISHERS

Domestic Liquid Fire Extinguisher, 0.7 L

Compact 0.7 L liquid extinguisher rated 3A 5F with FUREX CASA BIO agent for kitchens, living rooms, and bedrooms where a white domestic cylinder is preferred over a red EN 3-7 portable.

- 3A 5F on a 0.7 L liquid charge
- FUREX CASA BIO leaves minimal surface damage
- Class F cover for cooking fats and oils
- 286 mm high, 1.6 kg, white domestic cylinder

PRODUCT OVERVIEW

European-manufactured supplementary domestic liquid extinguisher from OGNIOTHRON S.A. in Poland, model Domowa 1, sized for a kitchen cupboard, hallway shelf, or bedroom wardrobe where buyers want Class F cover for cooking fats without the residue of dry powder. The 0.7 L FUREX CASA BIO charge is rated 3A 5F, approved for live electrical equipment up to 1000 V, and operates from -30 °C to +60 °C. The white cylinder ships without a wall hanger. It is designed for dwelling interiors rather than calculated workplace ratings: it does not carry EN 3-7 or CNBOP-PIB approval because of the white tank finish, and is intended as additional home fire safety equipment, not as the primary portable for a public building or commercial premises.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
