PRODUCT OVERVIEW

European-manufactured supplementary domestic liquid extinguisher from OGNIОCHRON S.A. in Poland, model UGPN-2x ABF/M (Domowa 2 white), sized for kitchens, living rooms, bedrooms, and hallways where buyers want a white cylinder that sits discreetly on a wall hanger. The 2 L charge combines demineralized water, FUREX A, and a FUREX AFFF cartridge for solids, flammable liquids, cooking fats and oils, and energised equipment to 1000 V, and operates from +5 °C to +60 °C. Each unit ships with a white metal basket wall hanger. The cylinder is designed for dwelling interiors rather than calculated workplace ratings: it does not carry EN 3-7 or CNBOP-PIB approval because of the white tank finish, and is intended as additional home fire safety equipment, not as the primary portable for a public building or commercial premises.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
