PRODUCT OVERVIEW

Polish-manufactured fire blanket safety sign from BP Techem Sp. z o.o., symbol F16 under PN-EN ISO 7010, sized 150 x 150 mm for kitchens, plant rooms, corridors, and domestic walls where a fire blanket is stored but not in the direct field of view from the room entrance. The sign is printed on photoluminescent hard PVC with adhesive backing across the full rear face so it can be fixed directly above the blanket or on the adjacent wall without a separate bracket. It carries CNBOP-PIB approval Nr 3910/2020 for the Polish market. Safety signage is not a portable extinguisher under EN 3-7 and does not carry an A/B/C fire-rating figure on the manufacturer's parameter sheet.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
