PRODUCT OVERVIEW

Swedish-manufactured moulded polymer fire extinguisher cabinet sized for 6 kg and 9 kg portable cylinders, for corridors, plant rooms, loading bays, trucks, and buses where buyers need the extinguisher secured against movement but still visible through the front window. The cabinet measures 715 x 335 x 240 mm, mounts on a wall or vehicle bulkhead, and ships with an integrated retention strap that holds the cylinder in place during transit. The red front cover opens on side latches so the extinguisher can be removed quickly without tools. It is an accessory cabinet only: the portable extinguisher is quoted separately.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
