PRODUCT OVERVIEW

Polish-manufactured fire extinguisher safety sign from BP Techem Sp. z o.o., symbol F01 under PN-EN ISO 7010, sized 150 x 150 mm for corridors, plant rooms, garages, and domestic walls where a portable extinguisher is mounted but not immediately obvious. The sign is printed on hard PVC with an adhesive backing so it can be fixed directly above the extinguisher or on the adjacent wall without a separate bracket. It carries CNBOP-PIB approval Nr 3910/2020 for the Polish market. Safety signage is not a portable extinguisher under EN 3-7 and does not carry an A/B/C fire-rating figure on the manufacturer's parameter sheet.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
