PRODUCT OVERVIEW

Polish-manufactured stored-pressure VER-DIS foam extinguisher from OGNIOPHON S.A., model GW-9x A/VER-DIS, sized for workshops, garages, offices, and e-mobility storage points where buyers need to cool and suppress lithium-ion battery fires on electric scooters, e-bikes, cordless garden tools, and small electrical appliances without the collateral damage of ABC powder. The 9 L VERDIS agent is rated 27A for Class A solids, approved for lithium-ion battery fires and live electrical equipment up to 1000 V at a minimum one metre stand-off, and operates from +5 °C to +60 °C. Each unit ships with a silver metal hook wall hanger. At 14 kg gross weight and 576 mm high it is the largest VER-DIS portable in the lithium-battery range and suits buyers who need CNBOP-PIB approved cover beside charging bays, repair benches, and battery storage without switching to a standard EN 3-7 powder line.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
