

HOME FIRE SAFETY EQUIPMENT

Glass Fibre Fire Blanket, 1.2 x 1.8 m

Woven glass fibre fire blanket to PN-EN 186:2019 with CNBOP-PIB approval, folded in a red wall-hang storage cover for kitchens, garages, and workplaces where a reachable smothering layer is preferred over spraying agent.

- PN-EN 186:2019 with CNBOP-PIB approval
- 1.2 x 1.8 m woven glass fibre
- Red wall-hang storage cover in every box
- Reusable after successful deployment

PRODUCT OVERVIEW

Polish-manufactured woven glass fibre fire blanket from PABIANTEX, model ECST 200-150, sized 1.2 x 1.8 m for kitchens, garages, workshops, and escape routes where buyers need a quick smothering layer beside the hob, barbecue, or fireplace. The blanket is type-tested to PN-EN 186:2019 with CNBOP-PIB approval, weighs 1.44 kg, and is folded in a red wall-hang storage cover with metal grommets and pull handles so it can be mounted at the hazard point without a separate extinguisher hanger. It smothers small reachable fires including pan fires and burning clothing by cutting off oxygen, and can be reused after a successful deployment. Fire blankets are not portable extinguishers under EN 3-7 and do not carry an A/B/C fire-rating figure on the manufacturer's parameter sheet.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
