PRODUCT OVERVIEW

European-manufactured house home safety kit from OGNIОCHRON S.A. in Poland, trade name Zestaw Bezpieczny Dom, sized for terraced houses and detached homes where buyers want early smoke warning plus separate extinguishers for cooking areas and higher-energy boiler-room or garage risks in one consignment. The bundle pairs a GP-4x ABC/MP 4 kg powder extinguisher rated 27A 144B C under EN 3-7 with CNBOP-PIB approval and a metal hook wall hanger, a red UGPN-2x ABF/M (Domowa 2 red) 2 L liquid extinguisher rated 8A 55B 40F with a red metal basket wall hanger, and a Kidde 2030-DSR optical smoke detector on a replaceable 9V battery. Both extinguishers cover energised equipment to 1000 V. The detector is certified to PN-EN 14604:2006 (EN 14604:2005) by TÜV Rheinland. The 2 L liquid cylinder is supplementary domestic equipment: it does not carry EN 3-7 or CNBOP-PIB approval because of the non-standard label, and is intended as additional home fire safety equipment, not as the primary portable for a public building or commercial premises.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
