PRODUCT OVERVIEW

Polish-manufactured compact warning triangle from MVM Sp. z o.o., trade name Trójkąt ostrzegawczy Micro, catalogue model TBA070, sized for passenger cars, taxis, driving-school vehicles, and fleet boots where a full-size triangle will not fit in the glove box or side pocket. The unit folds into a slim red protective case and deploys in seconds on folding metal legs with red reflective borders and a fluorescent orange inner frame for daytime and night visibility. Gross weight is 0.4 kg per the manufacturer's parameter sheet. Warning triangles are road breakdown accessories rather than portable extinguishers: they are not certified under EN 3-7 and do not carry a fire-rating figure or CNBOP-PIB approval on the retail parameter sheet. Motor-trade retailers stock article NV-WT-MICRO when buyers want the same compact triangle as a standalone SKU rather than only inside a vehicle safety bundle.

Values are the declared specifications for each article and are confirmed against the delivered batch on the order confirmation.
